chenqsh26@mail2.sysu.edu.cn

Education

Sun Yat-sen University, BS in School of Mathematics 09/2024 - 07/2028
Major: Mathematics and Applied Mathematics, GPA: 3.84/5.0
Courses: Probabilistic Theory (Honour) 99/100, Geometry and Algebra 97/100,
Discrete Mathematics 93/100

Research Experiences

Research Interns at Nanjing University (Suzhou) and online 01/2026 - now
Supervisor: Mingmou Liu

· Under the guidance of Prof. Mingmou Liu and Prof. Zengfeng Huang, I am currently exploring the Beck-Fiala Conjecture, a major open problem in the field of discrepancy. I am actively analyzing the methodology in the recent paper Decoupling via Affine Spectral-Independence: Beck-Fiala and Komlós Bounds Beyond Banaszczyk (Jiang, Bansal, 2025) and attempting to extend their framework to derive new results. · Reading the lecture notes *Sketching Algorithms* by Jenali Nelson and writing latex notes (under construction).

Summer School on Theoretical Computer Science at Nanjing University 06/2025 - 07/2025
Participant

· Explored foundational concepts in probabilistic concentration inequalities and distributed algorithms, focusing on subspace embedding and regression problems in randomized numerical linear algebra.

Else

· Extended knowledge by reading seminal texts and attending seminars, such as Sketching as a Tool for Numerical Linear Algebra by David P. Woodruff and The Probabilistic Method discussion group, and delivered talks on lower bounds of Ramsey numbers.

· Study graph theory under the guidance of my supervisor, having completed sections on trees, matching, and connectivity.

Skills

Software: Mathematica, LaTeX

Programming: Python, C++, Vibe Coding

English: IELTS: 7.0

Awards

· Provincial First Prize, National College Student Mathematics Competition (Guangdong Division) 11/2024
· Outstanding Student of 'Beauty of Computational Theory' Summer School, Nanjing University 2025
